QUALITY GATE CONDITIONS

✓

New Reliability Rating
Actual: A | Required: ≤ A — PASSED

✓

New Security Rating
Actual: A | Required: ≤ A — PASSED

✓

New Maintainability Rating
Actual: A | Required: ≤ A — PASSED

✗

New Code Coverage
Actual: 0.0% | Required: ≥ 80% — FAILED

✓

New Duplicated Lines Density
Actual: 0.0% | Required: ≤ 3% — PASSED

✓

New Security Hotspots Reviewed
Actual: 100% | Required: 100% — PASSED

⚠ Only Remaining Action: Add Test Coverage

- ✗ **New Code Coverage: 0.0%** — Must reach ≥ 80% on new code to pass the Quality Gate.
- 📁 Frontend: Add tests using **Vitest + React Testing Library** (already configured in the project).
 - 📁 Backend: Add tests using **Jest + Supertest** for API endpoint coverage.
- ✓ All other quality gate conditions (Security, Reliability, Maintainability, Duplication, Hotspots) are **fully passing**.
- 🇺🇦 Total issues closed this cycle: **44 issues** (10 security + 18 reliability + 16 maintainability).
